Radiation Safety Class Schedule

The 32-hour radiation safety course consists of classroom instruction, home study program and clinical experience in the dental employment office or dental facility that allows the exposure, processing and mounting of dental x-rays. Theory is offered through a home study program. The **one day of classroom instruction** will consist of practicing exposing, processing and mounting x-rays on a manikin and one clinical outpatient. Three full mouth surveys will be completed in your dental employment office or a dental facility that will allow you to expose dental x-rays.

Note: Certificates will be issued 7-10 days after the course.

Important Notice: 2026 Course Closure

EFDAA's regularly scheduled courses are suspended for the remainder of 2026 while we prepare for upcoming Dental Board site visits and evaluations at all locations. Our courses remain approved, and we are dedicating this time to the review process.

Updates about future course schedules and application dates will be posted on this website as information becomes available.

Custom Courses Remain Available

We continue to offer custom courses at our facilities or your dental office, with a minimum enrollment of four students. You may coordinate with other dental offices to meet this requirement.

Questions and Scheduling

During this period, we will be out of the office and unable to return phone messages. For questions or to schedule a custom course, please email **efdaa4u@efdaaservices.com**.

Thank you for your patience and understanding.

Minimum enrollment of **four students** is required for these class sessions.
Thank you for understanding and patience.
